

HOON CHANG

Georgetown University

Why did you apply to the Kaiser Permanente Mid-Atlantic States Internal Medicine Residency Program?

I fell in love with Kaiser Permanente and its patient-centered medical center model during my M3 clerkship. The system is set up so that both patients and providers can build meaningful relationships while minimizing time navigating the complex medical systems.

What makes you passionate about practicing medicine?

I find joy in helping others and building relationships – practicing medicine will let me do both.

What's a fun fact about you?

I love to binge-watch YouTube videos (a guilty pleasure), especially the short clips of Korean television shows.

How do you thrive?

I decompress by spending time with my family and friends. I love to play my guitar and learn cool new songs. Most importantly, spending time with God gives me the strength to tackle daily activities.
